10. (Amended) A method for the fabrication of decorative materials according to Claims 8 [and] or 9, distinguished by that the anisotropic layer transparent in the visible range is obtained using aqueous and aqueous-organic solutions of aromatic compounds absorbing in the spectral range below 400 nm, selected among a series of organic and inorganic salts of alkylbenzene sulfonates, sulfonic acids of the naphthalene series, mono- and polysulfonic acids of the derivatives of benzoimidazole and benzothiazole, anthraquinone, phenanthrene, amino-, hydroxy-, halido-, nitro-, and alkylanthraquinones, benzanthrone, 3-bromobenzanthrone, and water-soluble organic belofores and bleaching agents.

REMARKS

Applicants respectfully request the above amendments be entered to conform the claims to acceptable wording for multiple dependent claims according to MPEP §608.01(n) and to correct typographical errors.

Should the Examiner wish to discuss any aspect of this application, the Examiner is invited to telephone the undersigned agent for Applicants at (408) 453-9200.

Respectfully submitted,

Roberta P. Saxon
